SAFEJAWZ®
PROTECTION WITH PERSONALITY

IN YOUR FACE!

OK excuse the pun, but we couldn't resist. After all, that simple phrase's multiple meanings couldn't be more appropriate. Describing not only quite literally our products' use, but also our approach to product design and our overwhelming market exposure in our first 2 years.

Now available in 25 countries worldwide, the premise of SAFEJAWZ is a simple one; to provide advanced protective technologies ina product that allows wearers to express their personalities.

When did sports equipment get so serious anyway? And why do novelty and technology have to be mutually exclusive? They don't, and since launch at ISPO 2015, SAFEJAWZ has been proving it.

SAFEJAWZ boast some incredible advances in protective technology including FluidFit™ - allowing for a comfortable & retentive fit that can rival that of a dentist made guard. RemodelTech™, a system that allows for multiple attempts of the fitting process, and JawSecure™ a contoured base that can protect against concussion causing lateral impacts and the jaw itself.

Mouthguards no longer have to be an all-round nuisance thanks to SAFEJAWZ. We are here first and foremost to protect the user from injury & our creative approach to product design is getting more athletes, young and old, protecting their teeth while playing their sport. **Get in touch to see how YOU can join the SAFEJAWZ movement.**
